

Art Rosnovsky

Software Engineer (CIAM)

job@rosnovsky.us | (360) 513-6735 | github.com/rosnovsky | Arlington, WA | Remote preferred

Specialized **Customer Identity and Access Management (CIAM)** Engineer with extensive Auth0/Okta expertise and 5+ years of experience in JavaScript/TypeScript development. Proven track record implementing enterprise-grade identity solutions across multiple industries using React, Node.js, and modern cloud infrastructure. Passionate about building secure, scalable, and ethical software that makes a positive impact.

Core Competencies

- **Identity Engineering:** Enterprise SSO implementations, custom authentication workflows, B2B/B2C identity solutions
- **Frontend Architecture:** Component design, state management, responsive interfaces, accessibility
- **Solution Design:** Translating business requirements into technical implementations
- **Technical Communication:** Documentation, client-facing presentations, stakeholder management

Technical Skills

- **Identity & Security:** Auth0, OIDC/OAuth, Okta, JWT, SAML, Enterprise SSO, MFA, RBAC, API Security
- **Front End:** TypeScript, React, Next.js, Tailwind CSS
- **Back End:** Node.js, Next.js, REST APIs, MongoDB, PostgreSQL, Serverless Stack
- **DevOps/Cloud:** AWS, Azure, Docker, Kubernetes, CI/CD, GitHub Actions
- **Other:** former frontline reporter, can fly single-engine aircraft

Work Experience

Senior Auth0 Developer

[BeyondID](#), Remote • Apr 2024 - Jan 2025

- Architected and implemented enterprise-grade CIAM solutions for Fortune 500 clients in retail, financial services, and healthcare, improving security posture while enhancing user experience.
- Developed custom Auth0 Actions, Rules, and Hooks to meet complex authentication and authorization requirements.
- Created comprehensive CIAM training materials and documentation, becoming the go-to subject matter expert for identity implementation challenges.
- Built internal tools that streamlined identity-related workflows, reducing implementation time by 30%.

Software Engineer

[Auth0](#), Remote • Mar 2021 - April 2024

- Designed and delivered the [Quarterly Snapshot](#) feature on schedule, enhancing enterprise customers' visibility into platform usage and security metrics.
- Developed an AI-powered knowledge-sharing tool that saved 100+ hours of SME time annually while improving customer success team's access to critical information.
- Implemented critical security improvements to customer-facing tools, ensuring compliance with major frameworks (SOC2, NIST, ISO 27001, etc) requirements.
- Optimized AWS resource utilization, resulting in \$20K annual cost reduction while maintaining application performance.
- Collaborated cross-functionally with product, design, and customer success teams to deliver high-impact internal tools.

Developer Support Engineer

[Auth0](#), Remote • Dec 2019 - Mar 2021

- Successfully resolved over 2,000 support cases of various complexity with an average **cSAT of 99%** and **on-time SLA of 97%**.
- Assisted hundreds of major enterprise customers and startup teams with complex CIAM integration use cases.
- Guided hundreds of developers through Identity Management implementations in every environment imaginable.

Software Engineer

[Microsoft](#), Redmond, WA • Apr 2019 - Oct 2019

- Crafted both the UI and backend for an internal search application using `C#`, `.NET Core`, `MSSQL`, and `React`, scaling it from a prototype to a full-scale production app.
- Saved hundreds of hours of account managers' productive time by implementing a slick search UI and functionality

Software Engineer

[Transmark Logistics](#), Kent, WA • Oct 2018 — Mar 2019

- Lead a small team from inception of the project to its MVP
- Pioneered an internal shipment and task management system, saving users an average of 40 minutes of productive time per day through UI enhancements.

Web Developer

[AT&T](#), Bothell, WA • Apr 2017 - Sep 2018

- Executed over 100 updates and rectified hundreds of defects in the AT&T MyServices client portal.
- With primary focus on defect resolution, proactively researched and fixed issues outside of the scope of daily responsibilities

Education

- AA, Multimedia Design from [Fanshawe College of Applied Art and Technology](#) (London, Canada)
- BA, Journalism from [RUDN University](#) (Moscow, Russia)
- Data Foundations from [Udacity Nanodegree](#) (Remote)

Languages

- English — Fluent
- Russian — Fluent (comprehend Ukrainian 🇺🇦, Belarusian)
- Arabic — Basic

Open Source / Hobbie Projects

- [rosnovsky/astro-mastodon](#) - A simple Astro component for displaying Mastodon posts.
- [Plex Music Stats](#) - show your Plex music stats. | `typescript`, `react`, `remix`, `tailwind`
- [SafeSafe](#) - a private app to store your important documents, with automatic OCR and transcripts and vector search. | `typescript`, `react`, `nextjs`, `tailwind`, `tesseract`, `typesense`, `S3`, `SQS`
- [rosnovsky/sanity-autocomplete-tags](#) - A Sanity plugin for autocompleting tags.
- [Current Apple Music](#) - show what you're listening to on Apple Music.
- [rosnovsky/spinup](#) - A simple CLI tool for installing pre-defined software on new machines.
